Development Bootcamp

PROFILE

Motivated and meticulous full-stack web developer certified from a rigorous Full Stack Web Development program. Adept in a broad range of modern web technologies and eager to apply this expertise to contribute to forward-thinking projects. Dedicated to continual professional development and adept at adapting to the evolving landscape of web technology.

PROJECTS

Notes Taker PWA (Progressive Web Application)

JavaScript ES6+, Node.js, Express.js, Service Workers

Developed a Progressive Web Application for efficient note-taking, offering offline functionality and cross-device synchronization. Features include a user-friendly interface, local storage for data persistence, and service workers for offline access. Designed for optimal user experience, the app ensures seamless interaction with notes and a near-native feel on various devices.

Bookclub Web Application

JavaScript, Sequelize, MySQL, Handlebars.js, RESTful APIs, OAuth

Contributed to a team-built Bookclub Web Application, designed to foster a literary community. Involved in full-stack development, I focused on crafting a user-friendly interface and robust backend features. Utilizing technologies like Sequelize and OAuth, our project delivered a secure, scalable platform for book discussions and reviews, adhering to MVC architecture for maintainability.

Code Coffee Corner Web Application

Sequelize, MySQL, Handlebars.js, RESTful APIs, MVC Paradigm

Developed Code Coffee Corner, a web platform for coffee lovers and developers. Features responsive design, community engagement, and resource sharing. Built with Sequelize, MySQL, and Handlebars.js, it offers a smooth user experience and scalable MVC architecture.
